

Travertine-Light-Moulding-Ogee

Travertine is one the most popular tiles in the stone tile market. Now, we have extended our range with travertine mouldings. Travertine tile gets new accessories to finish your project with a smooth touch. Travertine moulding is called as ogee, dido or border as well. It is difficult to send a free sample of ogee, as it cannot be used later on if cut into pieces. You can give us a call to discuss your stone tile flooring and walling projects. We may send you photos of different ogees also we can suggest the best stone tiles and mouldings to fit to your bathroom, kitchen, hall, living room, conservatory, garden or patio for modern building decorations or period building renovations. We can arrange delivery of your orders from our warehouse in Rainham Essex (next to London) to anywhere in England, Wales and Scotland as well as continental Europe.
